3K series

Proven AOI Solution

The **3K SERIES** powered with Vectoral Imaging is a modular AOI system. This equipment can be placed at any location of the board assembly line providing better flexibility. The machine is equipped with the P series optical heads: PERFORM or PREMIUM to offer greater versatility. This solution using a high-precision technology ensures accuracy, repeatability and short cycle times with a state-of-the-art XY gantry (composite granite base) and the programmable illumination system i-LITE, a proprietary tri-color axial & radial lighting system.

Inspection quality,
throughput and ROI
without compromise

- ▶ For Post Print, Mixed Mode, Pre Reflow or Post Reflow applications
- ▶ 100% inspection: presence, absence, polarity and placement accuracy as well as OCV, solder joint and lead inspection with Profiler® tool
- ▶ JEDEC component library powered with Vectoral Imaging technology inspection tools
- ▶ Real-time Statistical Process Control (SPC) capability
- ▶ Automatic conveyor width adjustment for boards up to 18" x 16"
- ▶ Cycle time: 250 000 to 400 000 components per hour
- ▶ Powered by i-LITE (Programmable Illumination System)
